

Canon

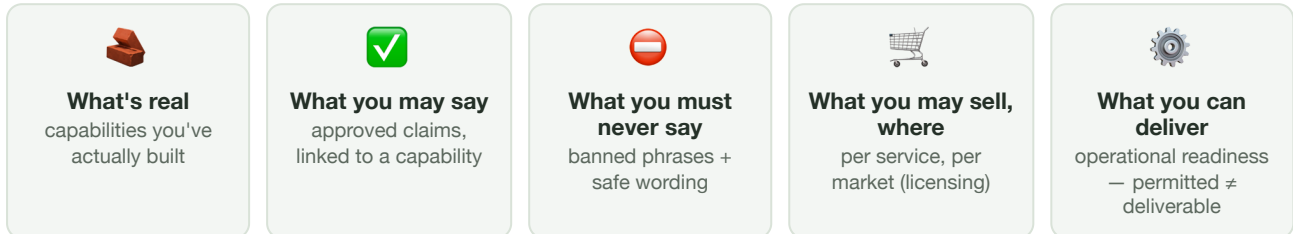

one source of truth → an automatic gate → the whole company stays honest as it scales

THE APEX · DECLARED ONCE

Strategy & reality — what the venture is, and what it has actually built

Everything downstream re-derives from here. It never overrides the truth above it.

↓
derives into machine-checkable registries (each row carries its proof)

every row carries its provenance — source · owner · evidence · expiry date

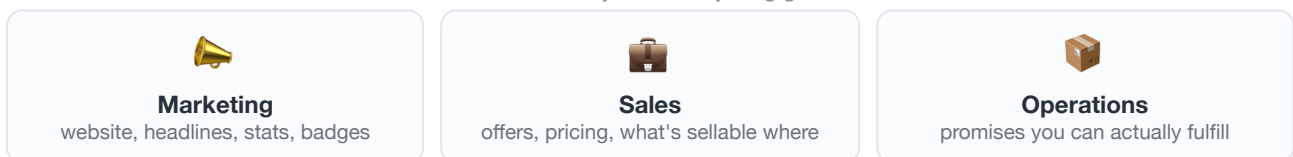

↓
feeds

THE CANON ENGINE · PURE & DETERMINISTIC

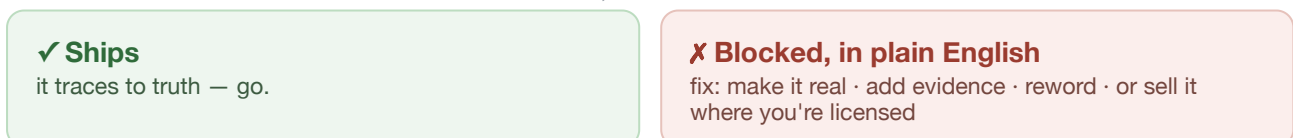

The gate — checks every claim, offer & promise against the truth

ships only if it maps to something real AND isn't banned

↓
runs automatically before anything goes out

↓
verdict, with the reason

↳ **Governance trails reality** — the day a capability becomes real, its claim clears itself.

Canon · reusable across ventures — one command drops this spine into any company, then it self-checks.
